

Barnards Farm is located in West Horndon, Essex. It is open to the public as part of the National Gardens Scheme and all proceeds from open days are donated to charity. Barnard Farm has 17 hectares of land and has a variety of gardens; it also has a small motor vehicle museum and 1920's cycle shop which is open to visitors on Sundays.

In their aeroplane hanger Richco were advised that the flooring area required re-surfacing. The area of floor measured 129 square metres, however the existing floor was made up from three concrete slabs which required moderate levelling.

The Richco application team carried out the floor preparation to the entire surface using our specialist vacuum assisted floor equipment and carried out any flooring repairs and levelling required.

Once the floor had been fully prepared and primed, Richco application team then applied Richco SL E-Coat with a decorative PVA flake.

Richco SL E-Coat is a self-levelling flooring system which provides a smooth, easy to clean surface with excellent resistance to chemicals. Richco SL E-Coat is suitable to even out rough floor finishes and incorporates abrasion resistant fillers, which produce a floor finish with the highest order of resistance. The introduction of the PVA flake also provides a decorative anti-slip finish.

The finished floor met with the client's requirements by providing a seamless, hardwearing, decorative flooring system.
